

**OBJECTIVES:**

- To display, study and process (on a computer outside the workshop) recordings made with REFLET.
- Enable creation of measurement screens.
- In the EXXOTEST training concept, REFLET and VISU establish the link between theory and practice, from the training module to the vehicle.

PRESENTATION:

The VISU software is on a CD-ROM to install on your PC type computer. **It may be installed with no restriction within the same establishment.**

The display software graphic interface enables processing of all data recorded using the REFLET software as well as the possibility of creating and modifying the measurement screens to be exported or imported between REFLET and VISU.

CLASSES CONCERNED

BEP M.A.
BACPRO M.V.A.
BAC STI
BTS M.A.V.A.

**PRACTICAL WORK
AND CORRECTIONS**

Enables setting up of PW on training modules and on vehicles

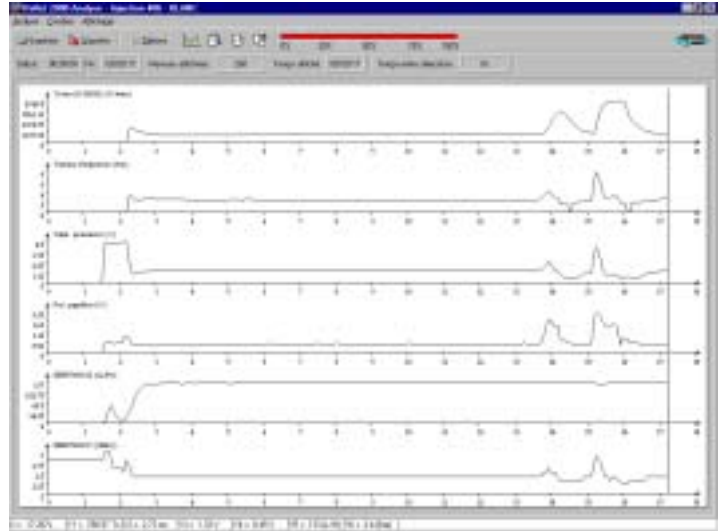

USE:

VISU2000W is used in the same way as for the **REFLET2000W** software except for the **ACQUISITION** part.

You may **EXPORT** or **IMPORT** screens or measurements between these two software.

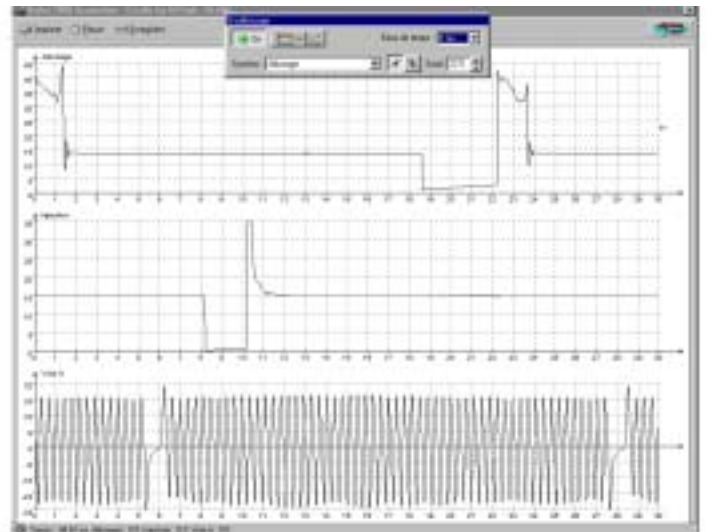

CHARACTERISTICS :

- Management of the different functioning modes (injection, air conditioning, ABS, laboratory, etc.).
- Analysis of automatic signals (cyclic ratio, injection time...).
- Creation of screens for use with REFLET.
- High-performance access rights management to prevent mishandling by students.

COMPUTER CONFIGURATION:

PIII 600 Mhz minimum
 128 MB memory minimum
 Windows 98 or XP, 2000
