

FirstLookTM

SenX Technology FirstLook Sensor

Taking the Pulse of Your Engine

DO THIS

Insert sensor probe into tailpipe of vehicle

Sensor sees the pulses generated by the expanding gases as the valves open and close

CONNECT TO THIS

Connect to any standard Automotive Lab Scope

GET THIS

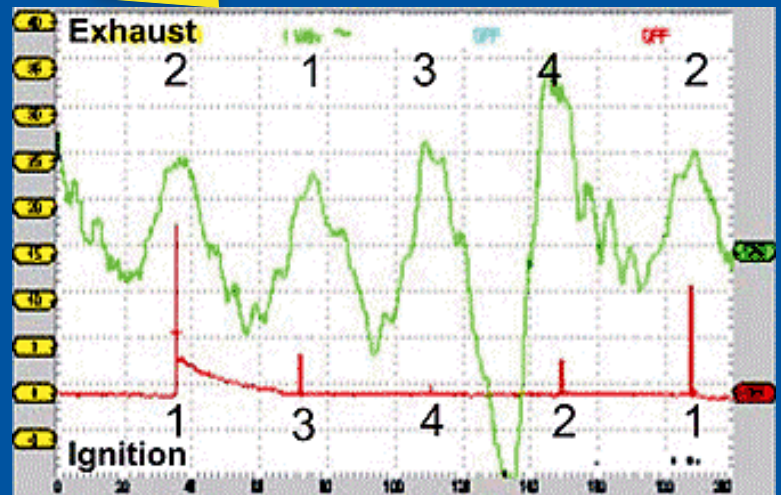

Sensor allows you to compare cylinders to see if one is not operating correctly

Trigger reference point helps tell which cylinder is bad

Trigger reference is Number 1

Number 3 cylinder shows a major deviation from the others

Cylinder has an open HT ignition lead
