

# FirstLook<sup>™</sup>

## SenX Technology FirstLook Sensor

# Taking the Pulse of Your Fuel System

## *DO THIS*

Insert sensor probe into the vacuum pressure regulator on the fuel rail

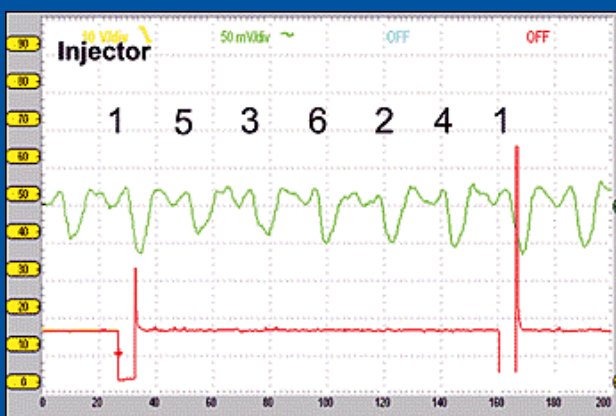

Make sure to plug the vacuum line going to the manifold

## *CONNECT TO THIS*

Connect to any Automotive Lab Scope

## *GET THIS*

Firstlook allows you to compare injectors as they operate

You can actually see the fuel rail in operation

What you are looking for is an injector that does not look the same as the others

In this engine the injectors are performing well
