Bmw E46 E39 Service interval Reset Procedure 2001 and on models

1/.Turn the ignition to the 0 position

2/.Press and hold the tripmeter button(in the instrument cluster)and turn the ignition key to position 1.

3/.Hold the button pressed for approx 5 seconds longer,untill the following appears in the display.

OIL SERVICE or INSPECTION with RESET or RE

Press the button again and hold for about 5 seconds untill the display **RESETor RE** flashes.

While the display is flashing,press the button briefly to reset the service interval.

After the display has briefly shown the new interval,it will change the brake fluid renewal interval reset.The following will appear in the display.

CLOCK SYMBOL

Press the button briefly to skip the brake fluid renewal interval reset menu.

The following display will then appear for approx 2 seconds

END SIE
