

# **BMW E70 Service Light Reset**

**Put key in slot.**

**Press start stop once and then again so all lights in cluster come on.**

**Make sure doors are closed and no warning on cluster.**

**If there are warnings, push the end of the left stalk until the main screen is in the cluster. Then push and hold the left button until it shows a service item to reset.**

**Once you see to the picture of the front brakes or rear brakes push and hold the button until it says reset.**

**Repeat procedure for rear pads.**
