

G-scan Debug report.

1. Turn on G-scan and go to the main screen,
2. Hold down the [F5] key whilst you press the [ESC] key.

3. Select the option [Log Start]
4. Perform your diagnosis on the vehicle which shows the problem encountered.
5. Exit out to the main screen after you have ended your Diagnosis.

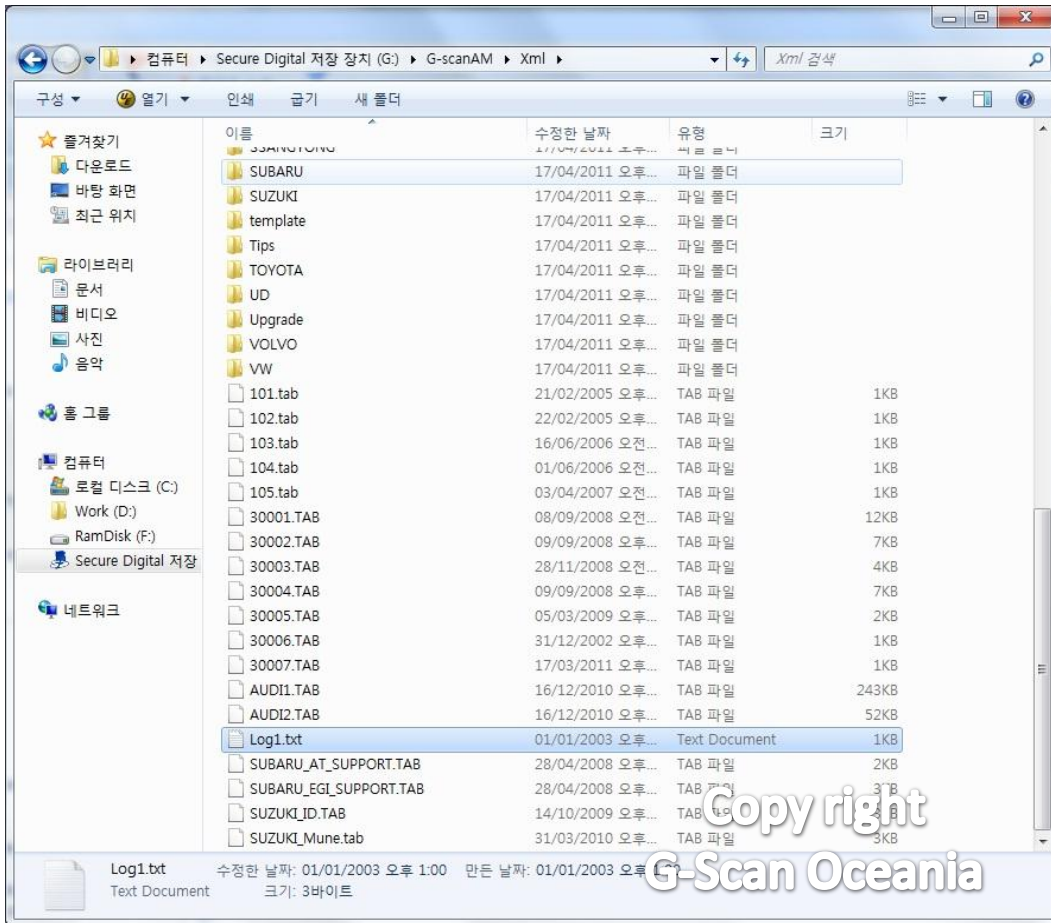

6. Press [F5] and [ESC] one more.

7. Select Log Stop.

8. Remove the SD card from the G scan and connect it to the PC.

9. Open the SD Card. **XX>G-scanAM>XML folder**

10. Find [LOGX.TXT] -> 'X' refers to a number. It maybe 1 or 2.

11. Send this file with VIN, Engine type, vehicle build date and any relevant information to support@gscan.com.au

Thankyou for helping make the tool better.
