

1. Select engine.

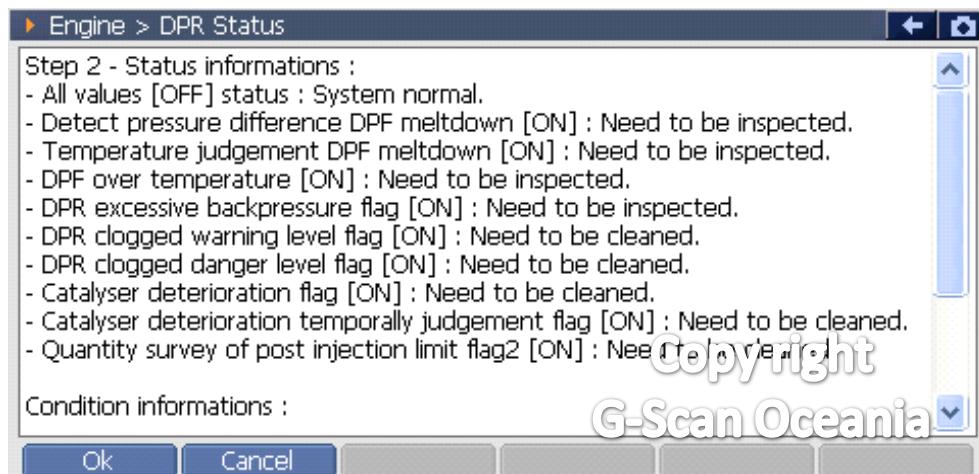

2. Select special function

3. Select DPR status

4. Information

5. DPR Status

The screenshot shows a software interface titled "Engine > DPR Status". It features a table listing various engine parameters and their current values. The table has columns for "Item", "Current value", and "Unit".

Item	Current value	Unit
Detect pressure difference DPF meltdown	OFF	
Temperature judgement DPF meltdown	OFF	
DPF over temperature	OFF	
DPR excessive backpressure flag	OFF	
DPR clogged warning level flag	OFF	
DPR clogged danger level flag	OFF	
Catalyser deterioration flag	OFF	
Catalyser deterioration temporally judgement flag	OFF	
Quantity survey of post injection limit flag2	OFF	

At the bottom of the screen are "Back" and "Exit" buttons. A watermark "Copyright G-Scan Oceania" is visible across the center of the table.
