VZ Commodore second hand ecu replacement using G scan

- Install second hand ECU, and using the G scan read the Vin from the Engine ECU information.
- On G scan go to Engine, special functions, then ECU reset using the 4 digit pin from the second hand unit.
- Go to Engine Special Functions, then Install PIM link to ECU

Follow the on screen instructions to complete this function using the original 4 digit security pin number

- Once the function is completed successfully, clear any remaining DTC's from the system.
