BATTERY INSTALLATION

A brand new Z5 will be delivered with its rechargeable battery detached. To power on and properly charge the Z5, install the provided rechargeable battery and connect the AC/DC adapter. Follow the steps described in this section to properly install the rechargeable battery to the Z5

1. Using a mini screw driver, remove the battery cover (2) by untightening 4 screws (1) located lower end of the cover.

2. Place the battery with its barcode facing upward and insert it with its gold contact aligned with the Z5.

3. Reinstall the battery cover.

EXTERNAL BUTTONS

**A. Power Button**

You can turn on/off the power of Z5 by using the power button placed at the top of the main module.

– Power on

To turn on the device, press and hold the Power button for a few seconds.

– Power saving mode (Sleep mode)

With the device powered on, tapping the power button will turn the device to Power saving mode. By tapping the power button again, the device will come back to its normal mode.

– Restart / Screenshot

Pressing the power button for longer than 2 seconds will display a popup for Power off, Restart, and Screenshot.

- Power OFF

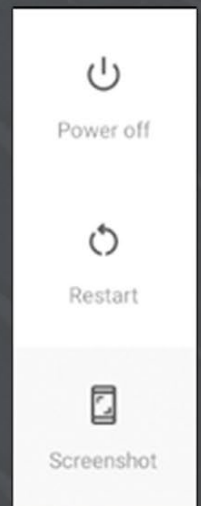

Closes all running applications and powers off the device.

- Restart

Closes all running applications and reboots the device.

- Screenshot

Captures a screenshot of the current screen and saves it in the image folder.

**B. Volume Control Button**

You can change the volume level with the volume control buttons.

The volume level is displayed on the popup menu as follows.

You can also control the volume for Media, Alarm and Notification by pressing the setting icon at the bottom of the popup menu.

SOFTWARE CONFIGURATION

System buttons in the bottom of the main screen provide basic functions that are useful for operating Zenith 5's Android System.

Back Button

Closes the current screen and returns to the previous level.

Home Button

- Returns to Home screen. If the Z5 program is shut down, Zenith software can be selected and executed again by selecting the Zenith icon.

App Running Button

- Displays the applications that are running in the background or recently executed. Z5 can be selected and executed again by selecting Zenith application while scrolling up and down.

Setting

Enables hardware configuration and preference setting for operating Z5.

Web Browser

Runs the default Internet browser.

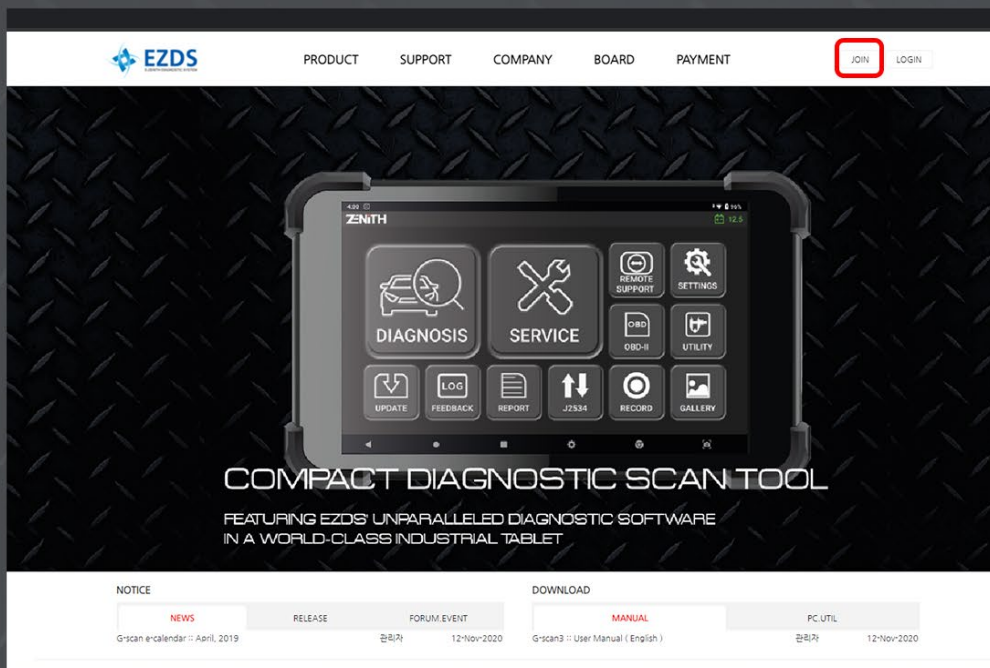

Screen Capture

Enables an instant screen capture while operating Z5

DEVICE ACTIVATION

A brand new Zenith Z5 will have the software installed when delivered. However, you need to create an account at EZDS website and complete product registration to properly activate the software.

Step 1. Go to www.zenithdiag.com and press the Join button to join the membership.

Step 2. Read the Terms of service carefully and click the check box if you agree. Then, press the [Sign Up] button.
