Caution!! After FG falcon key programming is performed, you must then perform [Parameter reset] to complete the process and be able to start the car!!

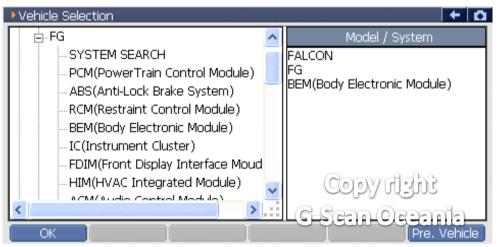

Caution!! Before performing Erase and Reprogram keys function, it is important to know that you will need security access codes to complete the Parameter Reset function.

Caution!! If you Erase and reprogram the keys, and cannot complete the Parameter reset function for failure to use correct Incode, the vehicle will remain in a lock down situation.

WARNING!! DO NOT ERASE AND PROGRAM KEYS IF YOU DO NOT HAVE ACCESS TO OBTAIN A CORRECT INCODE TO COMPLETE THE PARAMETER RESET FUNCTION. THE CAR WILL NOT START UNTIL PARAMETER RESET IS COMPLETE.

Caution!! The number of keys programmed must be more than 2. It is possible to program just one key, however if this is done the BEM module will have a DTC code present about the number of keys.

1. Select the FG falcon>BEM

2. Select special function

😑 Diagnosi:	s Menu > BEM(Body Electronic Module) 🔶	D
•	👄 DTC Analysis	•	
	👄 Data Analysis	•	
	Flight Record Review	Þ	
*	 Actuation Test 	Copy right	
•	Special Function	G-Scan Oceania)

3. Select Erase and program keys.

😑 Diagnos	is Menu > BEM(Body Electronic Module)		+ 0
•	Keyfob training		Þ
	 Erase and program keys 		•
	👄 Parameter reset		►
		Copy right G-Scan Ocea	

4. Turn ignition on.

5. Turn ignition to accessories.

6. Notice.

BEM(Body Electronic Module) > Erase and program keys	0	
Warning!! - The following procedure will erase all known keys. - It is important to have two keys available to program after this procedure as the vehicle will not start before two keys have been learned. - Be sure that all doors are closed.		
Do you wish to continue?		
Copy dight		

** After this step, G-scan will show the number of keys currently programmed.

7. Key programming instruction.

BEM(Body Electronic Module) > Erase and pr	ogram keys 🛛 🗲	D			
Reminder					
- You have 10 seconds to start programming the keys.					
- Within 10 seconds of door locks cycling, turn the first key from OFF to ON to					
teach key to the BEM.					
- Within 5 seconds insert the 2nd key into the ignition and turn the key from					
OFF to ON to teach key to the BEM.					
Repeat last step if a third or fourth key needs to be programmed. Doors will cycle once for 1st key, twice for 2nd, etc					
- The BEM will exit key learn mode after 10 seconds, cycling the lock once to					
indicate learning mode has been exited.					
-	their yaco				
Press [OK] to finish.					
	G-Scen Oceania	~			

** After this step, G-scan will show the number of keys programmed.

Caution!! After this function, you must then perform [Parameter reset].
