

## **RA Rodeo Remote Control Programming 2006-2008**

Note: A maximum of 4 remote transmitters can be programmed to the Keyless Entry control unit memory. If the number exceeds 4, then the oldest one will be erased.

1. Close doors and leave unlocked. Insert key into ignition switch.
2. Open the drivers door.
3. Turn the key to the ON position then to the Lock position three times within 5 seconds.
4. Within 5 seconds close and open the drivers door once (leaving the drivers door in the Open position).
5. Wait for 8 seconds. (This must be done)
6. Turn the ignition key to ON then to LOCK position and leave in the lock position.
7. Close the drivers door. The hazard lights should flash three times. (The system has entered programming mode)
8. Operate the Unlock button of the transmitters to be programmed 3-4 times. The hazard lights will flash to indicate the remote has been successfully programmed.
9. The hazard lights will flash approximately after 4 seconds after pressing the remote button to indicate the system has exited programming mode.
